ABOUT ME

Hello,
I'm Omar Ayoubi

ARCHITECT AND INTERIOR DESIGNER

EDUCATION

Bachelor degree of architecture
Damascus University Faculty of Architecture
2015–2020

LANGUAGE

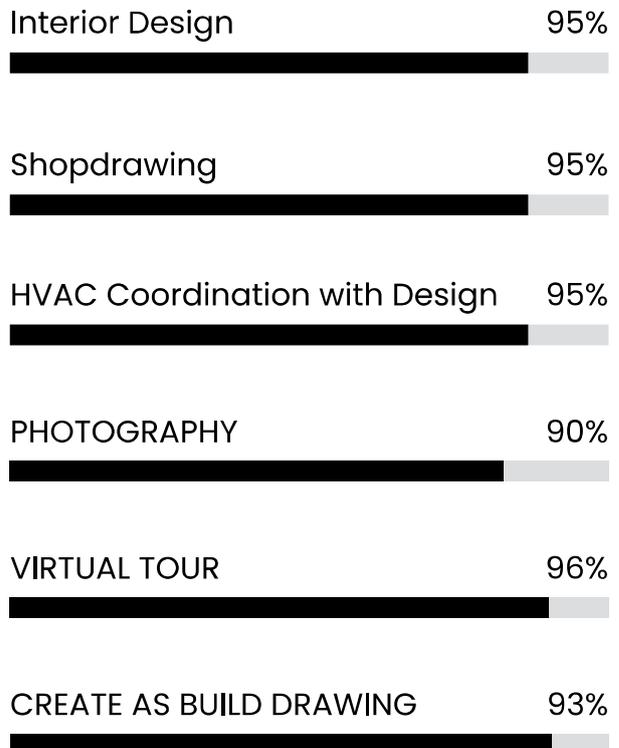

Arabic native - English Fluent

I am a 28-year-old architect with over six years of professional experience in various aspects of interior design and architecture. I became a resident of Qatar in 2015 and began my career in 2018 as a freelance designer while completing my studies at Damascus University's Faculty of Architecture, where I graduated in 2020. Upon graduation, I transitioned into a full-time role as a Technical Engineer and Designer at Palazzo Trading Contracting Design. I bring expertise in interior design, technical drawings, 3D rendering, and professional site photography, with a focus on delivering coordinated, detail-oriented solutions for complex projects.

SOFTWARE

GW-01 Gear Drive 3 Way Head

Blue Drive 3 Way Head
Geared adjustment, precise location

Leofoto GW-01 Geared Head Overview

The GW-01 is designed to offer precision control of camera movement and is ideal for studio still life photographers as well as those landscape photographers chasing golden hours at sunrise and sunset. The GW-01 delivers separate, precision movement in three directions. The controls allow the user to quickly set the camera position before using the large control knobs to apply minute movements guaranteeing absolute precision positioning for that perfectly framed shot.

The head can be rotated 360°, tilted 90° forwards or 30° backwards, as well as 90° sideways for portrait orientation. Each of these three movements function independently of each other and have individual, snap-lock knobs with easy-to-turn, 4-star grips. Turning each snap-lock knob allows the corresponding movement to be rapidly adjusted, and once the knob is released, the adjustment is locked into place.

To further promote fast and repeatable device positioning, this GW-01 3-Way, Geared Pan-and-Tilt Head also includes dedicated angle scales for each movement that are designed for easy visibility.
